EDUCATION

Bachelor's in Computer Engineering

GUJARAT TECHNICAL UNIVERSITY | 8.24 CGPA

Gujarat | June 2022

WORK EXPERIENCE

RANNLAB TECH PVT LTD | .NET DEVELOPER

Greater Noida, UP | Nov 2021 – Present

eEditorial Discovery(EED) is a web-based workflow management solution for any size publisher and other content creators. In EED, I worked as a full stack .NET developer, creating various analytical and feature-rich modules.

- Integrated PowerBI Analytical Reports using Azure AD and Power BI third party Integration tools like PowerBI Services, PowerShell, and JavaScript libraries.
- Developed and managed Azure Portal Service Principles and Security Groups for PowerBI services.
- Worked with a CEO to identify and resolve defects and teething (early stage issue) issues in a variety of modules.
- Created Plagiarism Checker as a utility tool that scans any text-based file and returns similar matches found on the internet.
- Implemented Custom Form in vanilla JavaScript that allows user to easily create dynamic forms.
- Tested multiple modules in XUnit using the Moq framework and tested API's in Postman.
- Constructed the Payeezy Payment Gateway for Invoice Billing and managed various software environments using Azure Pipelines CI/CD.

Delhi Transportation Cooperation (DTC) is software used to manage and track the electrical buses that run in Delhi, and I worked alongside the CEO on the project and created the whole system.

- Built and deployed the entire software from the ground up, utilising the AngularJS frontend framework and .Net backend framework.
- Implemented Business Logic and used Optimized queries that run 50% faster than the previous software.
- Utilized Dapper ORM, which makes the data access layer more secure and accessible.
- Created an interactive and user-friendly interface in AngularJS to improve user experience.

PROJECTS

MOVIE WEBSITE

C SHARP, .NET CORE, RAZOR, CRUD

- It is a website in which users can login and can check different movies based on genre and popularity, user can also be able to add different movies into their favorite list.
- This CRUD website is built using .NET Core, which makes this website cross-platform and data is managed in SqlServer.
- Developed a user-friendly UI in CSS using the bootstrap library.

POLYTRADE

C SHARP, .NET CORE

- It is a trading website in which user can see different stock prices for different products.
- JWT Authorization is used for user login.
